Clark named national welding testing center

×

Clark's welding technologies program allows students — and now professional welders seeking national certifications — to demonstrate their skills.

The Clark College welding technologies program is proud to announce its accreditation as an American Welding Society (AWS) testing center. This accreditation makes national certifications available to both students and professional welders in the region who are seeking to advance their careers.

Beginning May 1, Clark

will make a number of certifications available for testing. The most common is

the Certified Welder (CW), which tests welders on procedures used in the

structural steel, petroleum pipelines, sheet metal, and chemical refinery

welding industries. Certifications available include Steel, Stainless steel and

Aluminum. In conjunction with the AWS certification, Clark College also offers

the Washington Association Building Officials (WABO) welding certification at

the Clark facilities.

Fees for certifications

will start at \$300, with more-complex testing requiring up to \$600. All testing

will be completed at the Clark welding lab located on the main campus, at 1933

Ft. Vancouver Way in Building AA2. The college will provide all the needed

steel, stainless steel, and aluminum materials required for completing the certification examination.

Professionals

interested in testing for either AWS or WABO certifications at Clark College

may contact welding faculty member Brian McVay at 360-992-2359 or bmcvay@clark.edu

to discuss their certification requirements, the costs, and testing schedules. For

more information about Clark College's welding technologies program visit www.clark.edu/cc/welding.

"We are excited to be

able to serve our community by providing this unique testing, which will help

expand the opportunities for career advancement in the industry and support

this region's economy," said McVay, noting that the next-closest AWS Accredited

Testing Facility is in Tacoma, Washington.
